

3D Engineered Models for Construction Webinars

Register *NOW* for the next webinar!

WEBINAR SCHEDULE

8. *The Future: Adding Time, Cost and Other Information to 3D Models*

November 19th
1:00 – 2:30 p.m. EST

7. Steps to Requiring 3D Engineered Models for Construction

October 15, 2014 | 1:00 – 2:30 p.m. EST

www.nhi.fhwa.dot.gov/resources/webconference/web_conf_learner_reg.aspx?webconfid=27878

On Demand Webinar Videos

www.fhwa.dot.gov/construction/3d

1. *Overview of 3D Engineered Models for Construction.* Aired November 20, 2013.
2. *Creating 3D Engineered Models.* Aired January 8, 2014.
3. *Applications of 3D Models in the Construction Office.* Aired February 19, 2014.
4. *Applications of 3D Models on the Construction Site.* Aired April 2, 2014.
5. *Managing and Sharing 3D Models for Construction.* Aired May 7, 2014.
6. *Overcoming Impediments to Using 3D Engineered Models for Construction.* Aired September 10, 2014.

Webinar seven (7) will be very informative for those owner representatives that have been entrusted with implementing 3D Modeling for construction in their respective organizations. We will have two representatives who are from States that are already in an advanced stage of 3D Modeling implementation.

They will go through their planning process and explain how they got management and industry support. They will be discussing challenges they overcame as well as sharing lessons learned in implementing 3D Modeling for construction. Regardless of the stage/phase of your organization might be in, this webinar should help your team in implementation of 3D Modeling for construction as an accepted design business practice.
